

PROFILE SUMMARY

Computer Science graduate with hands-on experience in full-stack MERN development and real-time web applications. Skilled in React.js, Node.js, Express.js, MongoDB, and REST APIs with strong understanding of Data Structures & Algorithms. Passionate about building scalable and user-friendly applications.

EDUCATION

- **APC Roy Government College** - BSc in Computer Science, 2022–2025, Siliguri, West Bengal, India, CGPA: 7.55/10
- **Kendriya Vidyalaya No.1** - Intermediate (CBSE), 2021, Binnaguri Cantt, West Bengal, India, Percentage: 81.2%
- **ST. Francis Academy** - Matriculation (CBSE), 2019, Madarihat, West Bengal, India, Percentage: 87.6%

SKILLS

Programming Languages & Frameworks: C, Java, JavaScript, HTML, CSS, Python, SQL, C++, R Programming

Frontend Technologies: React.js, Tailwind CSS, Responsive Web Design, React Router

Backend Technologies: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Developer Tools: Git, GitHub

Core Concepts: Data Structures & Algorithms, Operating Systems, Computer Networks, System Design, Design Patterns, Design and Analysis of Algorithms

PROJECTS

College Doubt Appointment System | *Full Stack MERN*

- Developed a full-stack MERN application for students and professors to manage doubt booking appointments.
- Implemented authentication, booking management, and role-based dashboards for Admin, Professors, and Students.
- Built responsive frontend using React and backend APIs using Node.js, Express.js, and MongoDB.
- Integrated appointment scheduling and management features with seamless database connectivity.
- Used Git and GitHub for version control and collaborative project management.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Cloudinary, JWT, Tailwind CSS, Git, GitHub **GitHub Link**

Chat Application | *Full Stack*

- Developed a full-stack real-time chat application enabling seamless one-on-one messaging between users with instant message delivery.
- Implemented real-time communication using Socket.io with online/offline user status tracking and unseen message notifications.
- Built secure JWT-based authentication system with protected routes and integrated Cloudinary for image sharing.
- Designed responsive frontend using React.js and Tailwind CSS with context-based state management.
- Used Git and GitHub for version control and collaborative project management.

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Cloudinary, Tailwind CSS, Git, GitHub
